SUMMARY

Software Development Engineer (CSE, NIT Agartala) experienced in building production **GenAI systems** (RAG pipelines, LLM apps) and scalable **full-stack & backend services**. Skilled in **Python, TypeScript, React, NestJS, Node.js**, REST APIs, SQL, and **AWS** (Bedrock, Lambda, S3, DynamoDB), with strong testing, CI/CD, and end-to-end ownership from API design to deployment and monitoring.

EDUCATION

National Institute of Technology, Agartala <i>B.Tech, Computer Science and Engineering; CGPA: 7.55</i>	Nov 2022 – May 2026 Agartala, India
Sigma School of Excellence, Rajasthan <i>Senior Secondary (XII); Percentage: 87.4%</i>	April 2020 – March 2021 Rajasthan, India
Jawahar Navodaya Vidyalaya, North Tripura <i>Secondary (X); Percentage: 94.4%</i>	April 2018 – March 2019 Tripura, India

EXPERIENCE

Amdocs <i>Software Development Engineer Intern</i>	Jan 2026 – June 2026 Pune, India
- Built GitSense (NestJS, React, TypeScript), a RAG tool that answers questions about a codebase with source-cited results, using AST code chunking, Titan v2 embeddings, and hybrid kNN/BM25 search over S3 Vectors. - Contributed to Docu AI, a GenAI tool that auto-writes documentation from pull-request changes using AWS Bedrock and posts it to Confluence; set up GitHub Actions CI/CD and CloudWatch monitoring. - Built a YAML-based test suite that automatically checks the RAG pipeline's answers, verifying file paths, code snippets, and tool outputs after every change. - Built the React UI for searching the codebase and viewing cited answers; took part in API design, code reviews, and sprint releases.	
National Informatics Centre, Govt of India <i>Software Development Engineer Intern</i>	June 2025 – July 2025 Agartala, India
- Designed and tested RESTful Spring Boot APIs for the RTI registration system; wrote PostgreSQL queries and verified data correctness across multiple tables. - Tested API endpoints with Postman, checking request/response formats, status codes, and edge cases to keep data consistent.	

PROJECTS

LiveLocator <i>Node.js, Express, Socket.IO, Leaflet.js, EJS</i>	🌐 Live Demo
- Built a real-time location-tracking web app with Node.js, Express, and Socket.IO; used WebSockets for instant two-way updates so each user's marker moves live on a shared Leaflet.js + OpenStreetMap map. - Handled real-world edge cases — dropped connections, stale sessions, and denied location permissions — and tested for multiple users and smooth reconnects.	
Portfolio Website <i>React, Vite, TypeScript, GitHub Actions, GitHub Pages</i>	🌐 Live Site
Built and deployed a responsive personal portfolio (glassmorphism UI, dark/light theme) with automated GitHub Actions CI/CD to GitHub Pages on every push.	

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C/C++, HTML/CSS
GenAI & LLMs: RAG Pipelines, AI Agents, Embeddings, Prompt Engineering, AWS Bedrock
Frameworks & Backend: React.js, NestJS, Node.js, Express.js, Spring Boot, REST APIs, Microservices
Cloud & DevOps: AWS (S3, Lambda, Bedrock, DynamoDB, CloudWatch), Git, GitHub Actions, CI/CD, PostgreSQL
Testing & Fundamentals: Postman, REST API Validation, Automated Testing, DSA, DBMS, OS, OOP

ACHIEVEMENTS

- **JEE Main 2022** — Ranked among **top 1.6 percentile** out of 1.2 million candidates.
- **CodeChef** — Rank **329** in Starters 196 among 29,657 participants; 2★ rated (1415).
- **Smart India Hackathon** — Team of 5 selected among **top 12 college teams** for project idea and presentation.
